Seedance 2.0 散文式提示词（5 段对应 5 场）：

S01: Underground cathedral space, massive sandstone columns hanging from 30-meter ceiling like frozen waterfalls, glowing blue hieroglyphic grooves pulsing slowly on every column surface like veins, a fist-sized crystal core floating at center radiating deep blue light, star-map light patterns moving on ceiling, sand particles floating upward defying gravity, female figure in purple damaged armor with gold burn marks standing at edge, male figure with cracked wrist device behind her, cinematic wide establishing shot, arrakis_palette meets ancient_egypt_cyber, bioluminescent_throat lighting

S02: Sand floor erupting with oxidized green copper wires like plant roots, each wire etched with micro hieroglyphs that glow on contact with air, copper ring spine segments rising from sand one by one with fiber optic bundles between each ring pulsing faster and faster, curved blade-shaped copper rib plates vibrating independently, copper bandage-wrapped head with no face only single green-glowing eye visible through wrapping gaps, space shifting from deep blue to harsh white as all hieroglyphic grooves double in brightness, industrial grime meets bioluminescent resin, oxidized metal pipes

S03: Sand pouring from ceiling cracks forming rising wall sealing entrance, fiber optic tentacles with copper blade tips extending from mummy ribcage gaps opening slowly like jellyfish tendrils in harsh white light, purple armored female figure being knocked back three meters boots plowing sand furrows, cracked wrist navigator screen showing red countdown text, sealed tomb atmosphere with no exit, cold steel blue lighting meets emergency beacon glow

S04: Three fiber optic tentacles piercing purple armor shoulder and wrapping leg joint, black hydraulic fluid spraying in white light, male figure crouched behind sandstone

column running frequency waveform scan on cracked navigator screen, purple energy short blade extending from elbow joint, armored female figure being dragged across sand toward mummy then reverse-stabbing seventh cervical copper ring from behind, entire fiber optic spine color-shifting from green to purple spreading outward from insertion point, muzzle flash against darkness meets motion tracker POV aesthetic

S05: Crystal core transitioning from deep blue to transparent revealing miniature rotating nebula inside, all hieroglyphic grooves reigniting in dark gold light transforming entire cathedral space, male figure pressing crystal into chest energy port with three click-lock sounds, INTERCUT: pure white assembly platform with rows of identical purple armor frames each bearing same hieroglyphic signature, a hand reaching in to adjust core processor, memory fragment shattering like corrupted data stream, hieroglyphic signature flashing once inside crystal core then vanishing, cracked goggle lens retaining dark gold afterimage of signature embedded in glass fractures, astral_projection meets silver_cord aesthetic for memory overlay

角色图 / 关键构图

Banana SBP 单帧（6 张核心构图）：

① VEXA-09 与 KAEL

站在祭坛边缘仰视悬浮晶核，蓝色星图光斑投在他们身上——尺度对比（人极小，空间极巨）

② 木乃伊脊椎从沙中升起的侧面剪影，光纤束在铜环间传导绿光——阶梯式揭面的中间态

③ 光纤触须末端铜刃在惨白光中张开的特写，背景虚焦为 VEXA-09

的紫色轮廓——深海掠食者构图

④ VEXA-09 被拖行中反手刺入第七节铜环的动态瞬间，紫光短刃与绿光单眼同框——决定性瞬间

⑤ KAEL 将晶核接入胸口能量器的特写，暗金光从接口缝隙溢出——续命时刻

⑥ VEXA-09 护目镜碎裂侧的极近特写，裂缝中嵌着暗金色签名残影，她的瞳孔在裂缝后方失焦——身份线视觉锚

对话音频

**GPT-SoVITS

Fish Audio 分角色方案: **

VEXA-09: 中低频女声，气息稳定但有金属质感的微弱混响（模拟护目镜/面甲的声腔共振），S05 记忆闪回后音调下降半音，尾音出现 0.1 秒延迟

KAEL: 中频男声，语速偏快带技术人员的节奏感，S04

发现弱点时语速骤降、音调变平（外科手术式冷静），S05 劫后余生的沙哑+黑色幽默的上扬尾音

制造者声音（S05 画外音）：深度失真电子音，像从水底传来，无情感色彩，仅出现 2 秒，音量比主对话低 30%

导航器文字

AE 合成方案：KAEL 导航器屏幕采用裂纹叠层+古埃及象形文字字体（自动翻译为中文字幕悬浮在屏幕上方），倒计时数字使用红色单色显示，S04 频率扫描波形图采用绿色示波器风格实时跑动

环境音效

S01: 象形沟槽蓝光脉动的低频嗡鸣（40-60Hz 持续底噪）+ 沙粒上浮的细微摩擦声（ASMR 质感）+ 导航器报警的单声哔

S02: 铜丝从沙中翻涌的金属刮擦声 + 光纤脊椎脉冲加速的电子心跳（从 60bpm 加速到 180bpm）+ 铜片肋骨震颤的昆虫翅频嗡鸣 + 空间亮度翻倍时的电容放电声

S03: 护盾撞击铜绷带的蓝色电弧爆裂声 + VEXA-09 被弹飞后靴跟犁沙的摩擦声 + 沙墙从穹顶倾泻的持续沙瀑声（渐强）+ 沙墙封顶时的闷响（棺盖合上）

S04: 触须穿甲的金属撕裂声 + 液压液喷射的气压声 + 频率扫描的电子哨音 + 紫光短刃刺入铜环的"叮"——清脆单音 + 光纤脊椎变色时的连串电子降调 (绿→紫的音高下行)

S05: 晶核接触皮肤的玻璃共振音 + 沟槽熄灭时的完全静音 (1 秒) + 沟槽暗金重亮的低频共振 + 锁扣咬合三声脆响 + 记忆闪回时的白噪音+失真电子音 + 数据碎裂时的数字撕裂声 + 木乃伊单眼最后传输的 0.8 秒数据音 (高频窄带信号, 像传真机)

配乐情绪

S01 (0:00-0:22): 敬畏寂静 — 低频持续音垫 (大提琴泛音+合成器 pad), 偶有单音钢琴点缀如水滴落入深井, 无节奏, 呼吸感

S02 (0:22-0:42): 恐惧爬升 — 弦乐组渐强的不和谐半音进行, 定音鼓心跳节奏从 60bpm 加速到 120bpm, 铜管低音号出现暗示命运主题

S03 (0:42-1:00): 绝望封顶 — 全弦乐组 fff
持续不协和音程, 打击乐进入 (太鼓+金属打击), 沙墙封顶瞬间一切切断→0.5 秒完全静音→触须指向 VEXA-09 时单音号角

S04 (1:00-1:35): 绝望→精准→爆发 — 前段延续 S03 的不协和弦但降至 pp, KAEL 扫描时只留电子合成器的精密脉冲, VEXA-09 反杀瞬间全管弦爆发 (铜管主旋律+定音鼓重击), 短刃刺入铜环时一个下行五度的"命运音程"终止

S05 (1:35-2:00): 释放→深寒 — 晶核激活时温暖弦乐短暂出现 (3 秒), KAEL 续命成功的数据音叠加轻微电子音乐的释放感; 记忆闪回开始后所有温暖声部抽离, 只留玻璃琴+反向播放的人声采样+极低频 sub-bass, 签名闪灭时一声清脆的玻璃碎裂音, 之后持续低频不安底噪至片尾, 不解决
